What is Journey Atelier by AI?

What is Journey Atelier by AI?

Crafted Journeys. Cultivated Community.

Journey Atelier by AI is a way of designing travel — where journeys are **created**, not searched for.

Instead of selecting filters or browsing endless options, you simply **describe what you want**: a place, a feeling, a moment, or a specific request.

From there, our AI acts as a **digital atelier** — interpreting your intent and shaping it into a coherent, bookable journey.

Journey Atelier by AI doesn't return random results or standard packages.

It:

- understands *what you are asking for* — even when it's open-ended or emotional
- translates your words into travel logic
- aligns destinations, timing, accommodation, and services into one clear solution

Whether your request is:

- “*Japan in spring*”
- “*a perfect honeymoon getaway*”
- “*a 4-star hotel in London with half board from November 1st to 6th*”

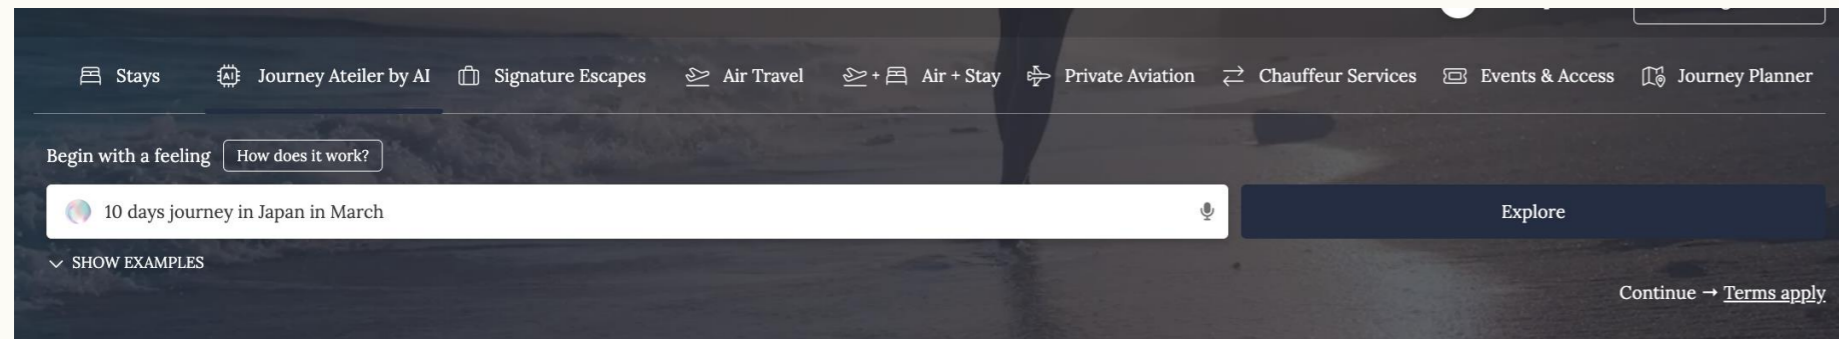

The process is the same: **your intent becomes the blueprint.**

How Journey Atelier by AI Works

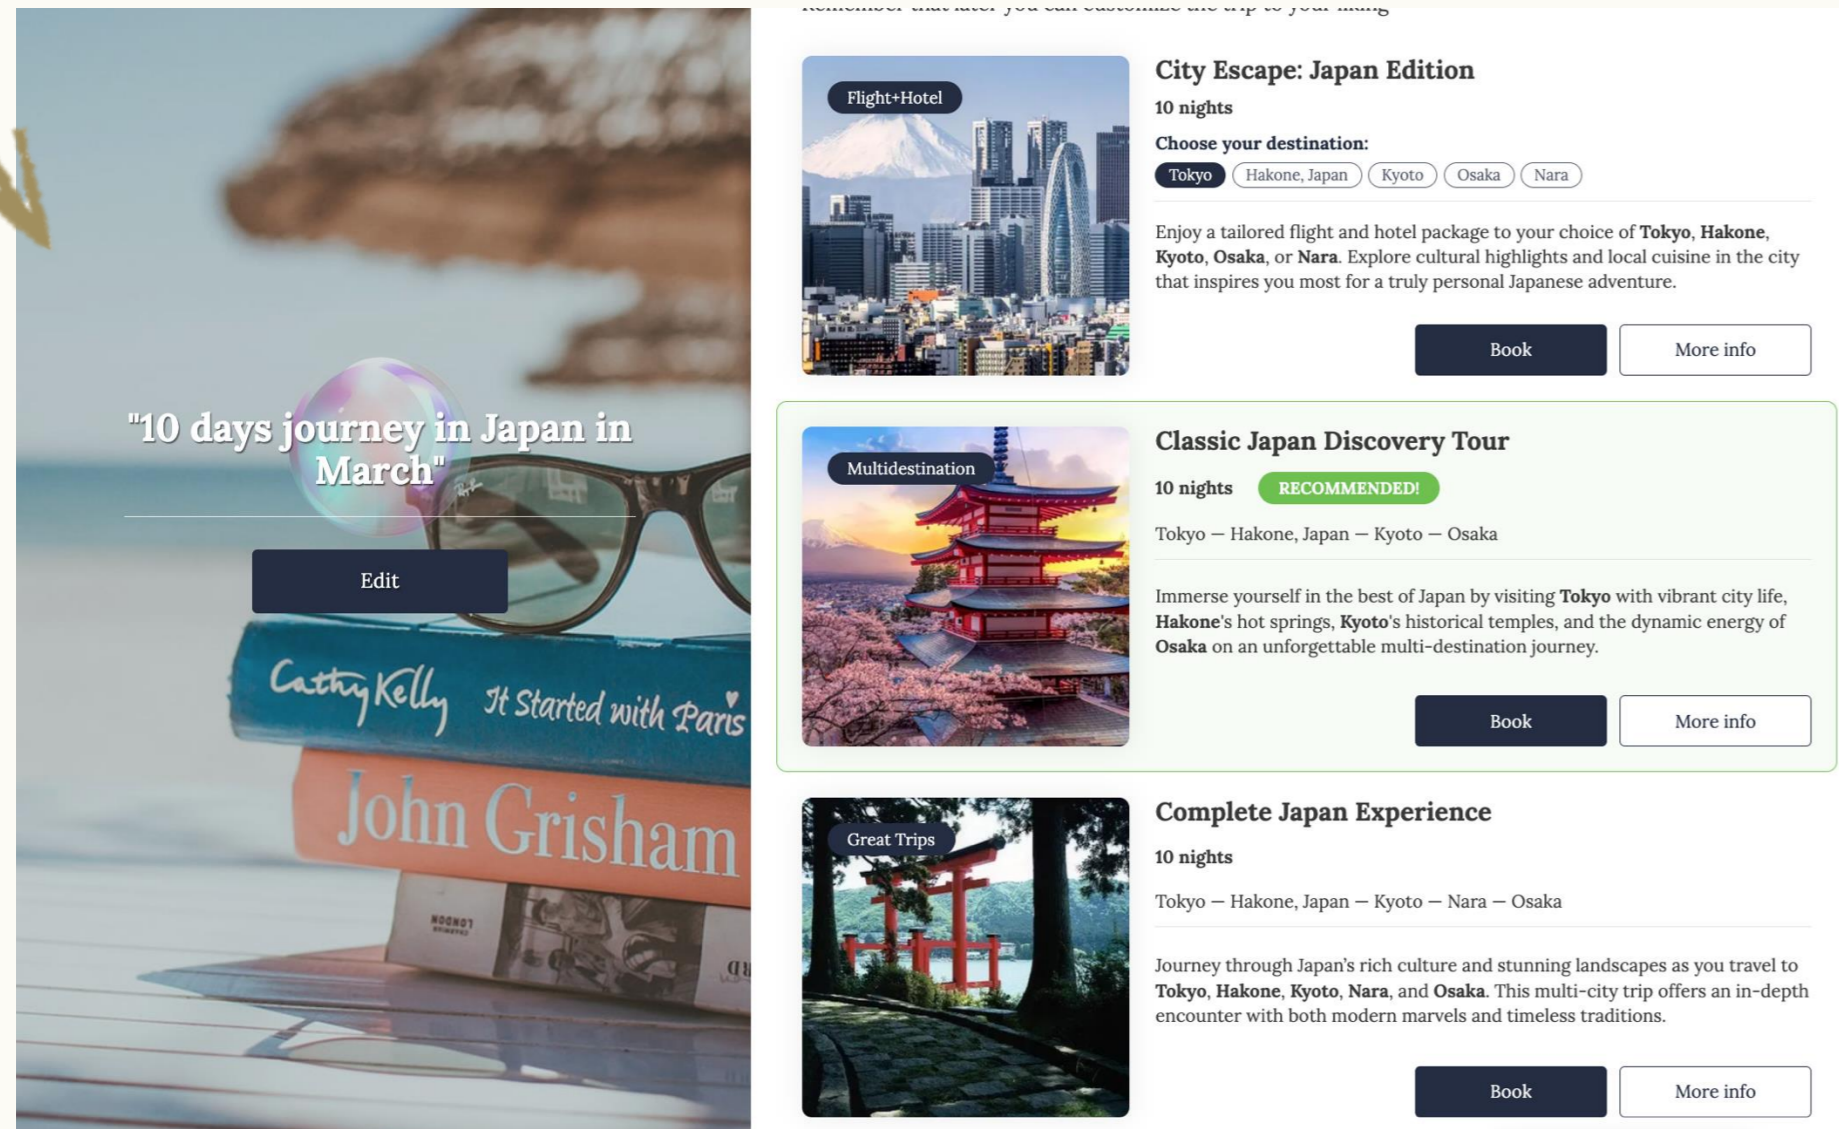

How Journey Atelier by AI Works

Crafted Journeys. Cultivated Community.

Start by writing your request in the search bar — it can be a feeling, an idea, or a specific travel need.

Once you click **Explore**, Journey Atelier by AI takes over.

After you submit your request, a **dedicated results page** opens with the **best-matched journeys** for what you described.

This page is not a generic search result.

It is a **curated selection**, where:

- Destinations match your intent
- Trip length and season are aligned
- Formats vary (city escape, multi-destination, complete journey)
- Each option is ready to book or refine

Every itinerary created by Journey Atelier by AI is **fully flexible**. At the next steps, you can customize:

- **Flights** — choose departure city, class, or travel without flights
- **Hotels** — select the option that fits your style and comfort level
- **Activities & services** — include, adjust, or skip experiences

How Journey Atelier by AI Works

Crafted Journeys. Cultivated Community.

When you click **More information**, the journey opens into a **dedicated itinerary page**.

This page shows how your trip unfolds — city by city.

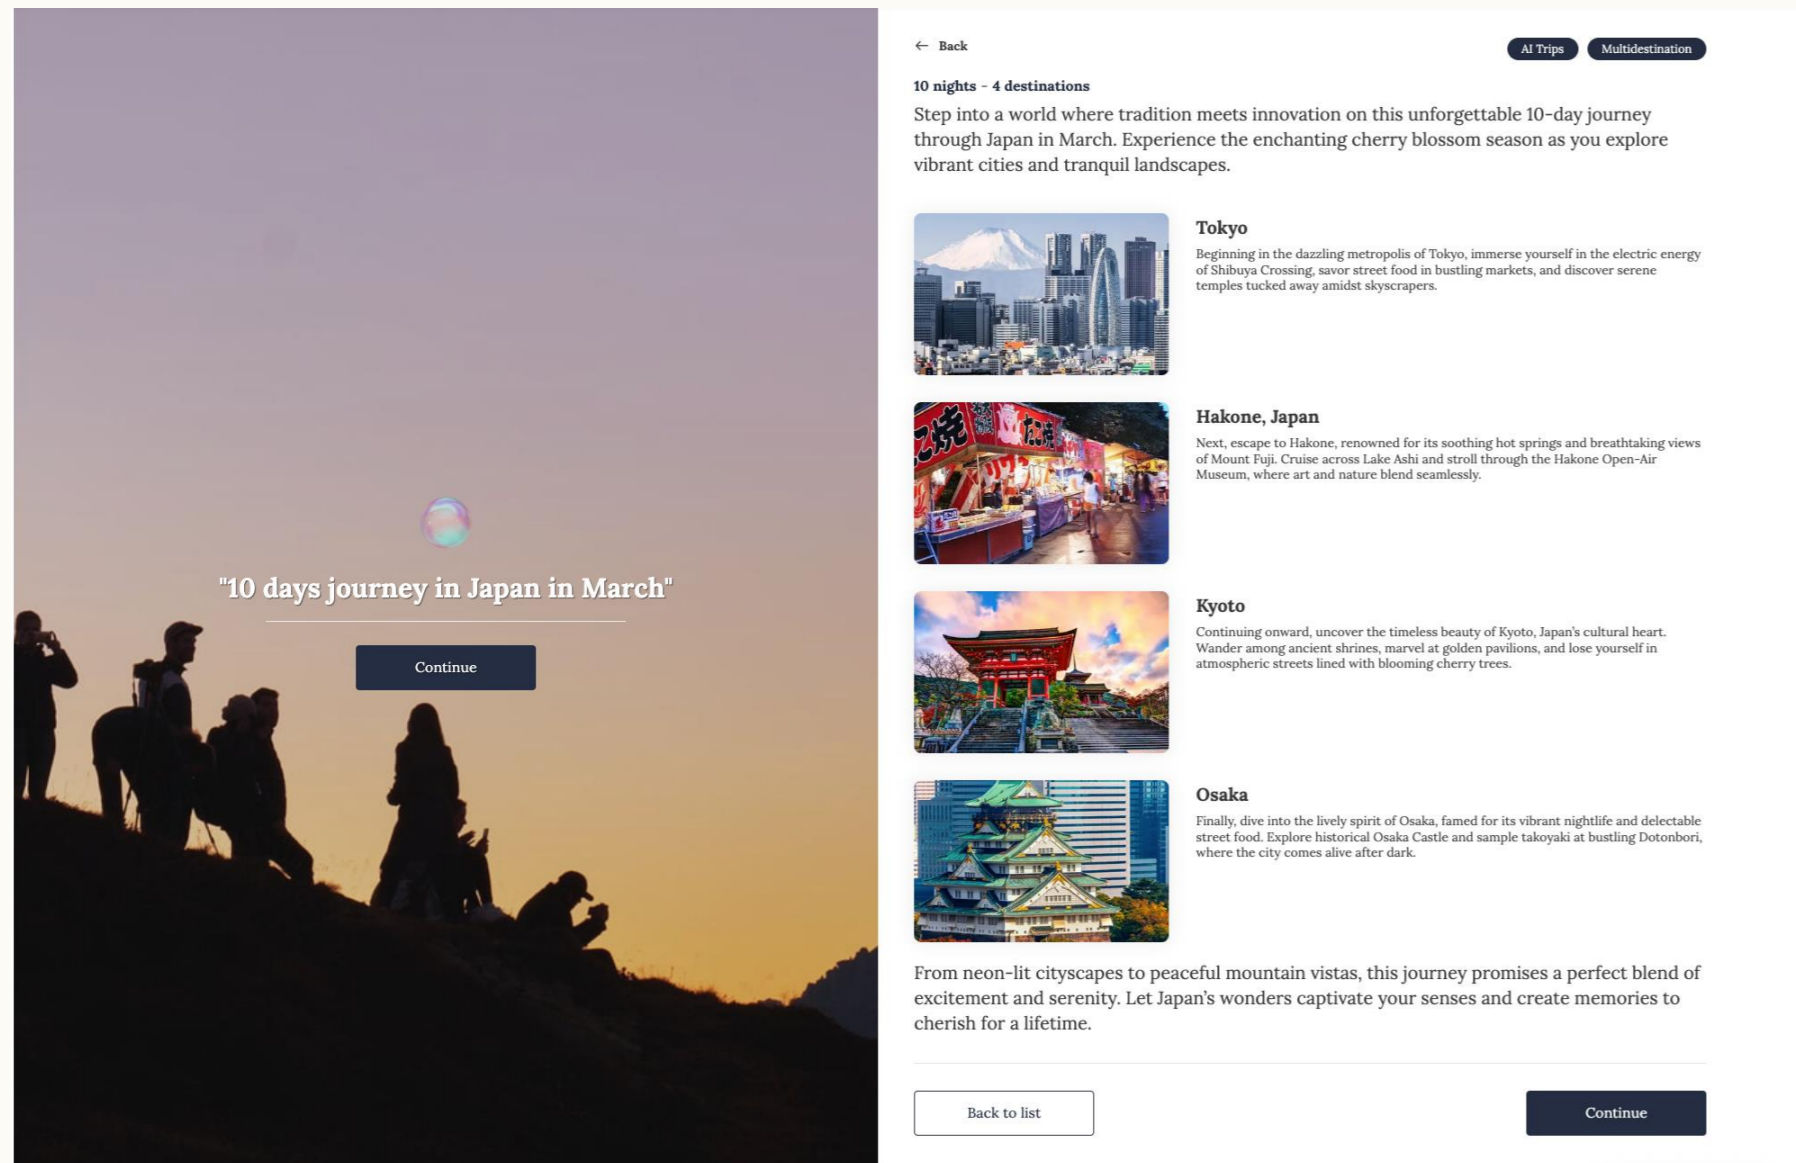

What You See on the Itinerary Page

The itinerary page gives you a **structured overview** of the journey, including:

- Total trip duration and number of destinations
- The route and order of cities
- A short description of each destination
- The overall narrative and rhythm of the journey

Rather than a rigid day-by-day schedule, this page helps you understand:

- What kind of experience each place offers
- How the journey flows from one destination to the next
- Why these cities belong together

How Journey Atelier by AI Works

The screenshot shows a travel itinerary page titled "10 days journey in Japan in March". It features a "Continue" button and a list of destinations: Tokyo, Hakone, Japan, Kyoto, and Osaka. Each destination has a small image and a brief description. At the bottom, there are "Back to list" and "Continue" buttons. A yellow arrow points from the "Continue" button in this screenshot to the booking engine screenshot below.

Once you're happy with the itinerary, click **Continue**. A booking panel opens where you can add the final details needed to prepare your trip.

And again, Journey Atelier by AI proposes a **best-matched journey**, but the final choice is always yours.

You can:

- tailor the trip to your preferences
- compare different options
- build the version that feels right for you

In the booking engine, you can enter:

- **Starting date** of your trip
- **Departure city** (origin of travel)
- **Number of guests and room setup**
- **Nationality** (for flight and travel requirements)
- **Flight preference**
 - include flights
 - or continue without flights

This information allows the platform to adapt the journey precisely to you.

The screenshot shows a booking engine interface with the title "Select the starting date of your trip". It includes a user profile "LO Liza Operator" with a "Change user" button. There is a checkbox for "I don't want flights". The "Nationality" dropdown is set to "Russian Federat" and the "Class" dropdown is set to "Economy". The "Origin" field contains "I.". The "Start date" is set to "01/03/2026". The "Select guests" dropdown is set to "1 room, 2 adults". There is an "Explore" button and a "Continue" button with a link to "Terms apply".

and create memories to cherish for a lifetime.

Continue → Terms apply

After you complete the booking details, an **interactive map** opens with your full journey laid out visually.

This is where you can **shape the trip exactly the way you want**.

On the map and itinerary panel, you can:

- **Adjust the number of nights** in each destination
- **Reorder or remove destinations**
- **Add new cities or regions** to the route
- **Include or exclude hotels and transport** per stop

Every change updates the journey logic instantly.

Designed for Freedom, Not Fixed Routes

The map allows you to:

- See how your journey flows geographically
- Balance pace and travel time
- Experiment with different versions of the same trip

Nothing is fixed. You are free to explore, adjust, and refine until it feels right.

Once you're happy with the route and the duration in each destination, click **Continue**.

The platform will open the page for your **first destination**.

Add other services for your trip in Tokyo.
Add Activity Add Transfer

On each destination page, you can fully personalize how you travel and stay.

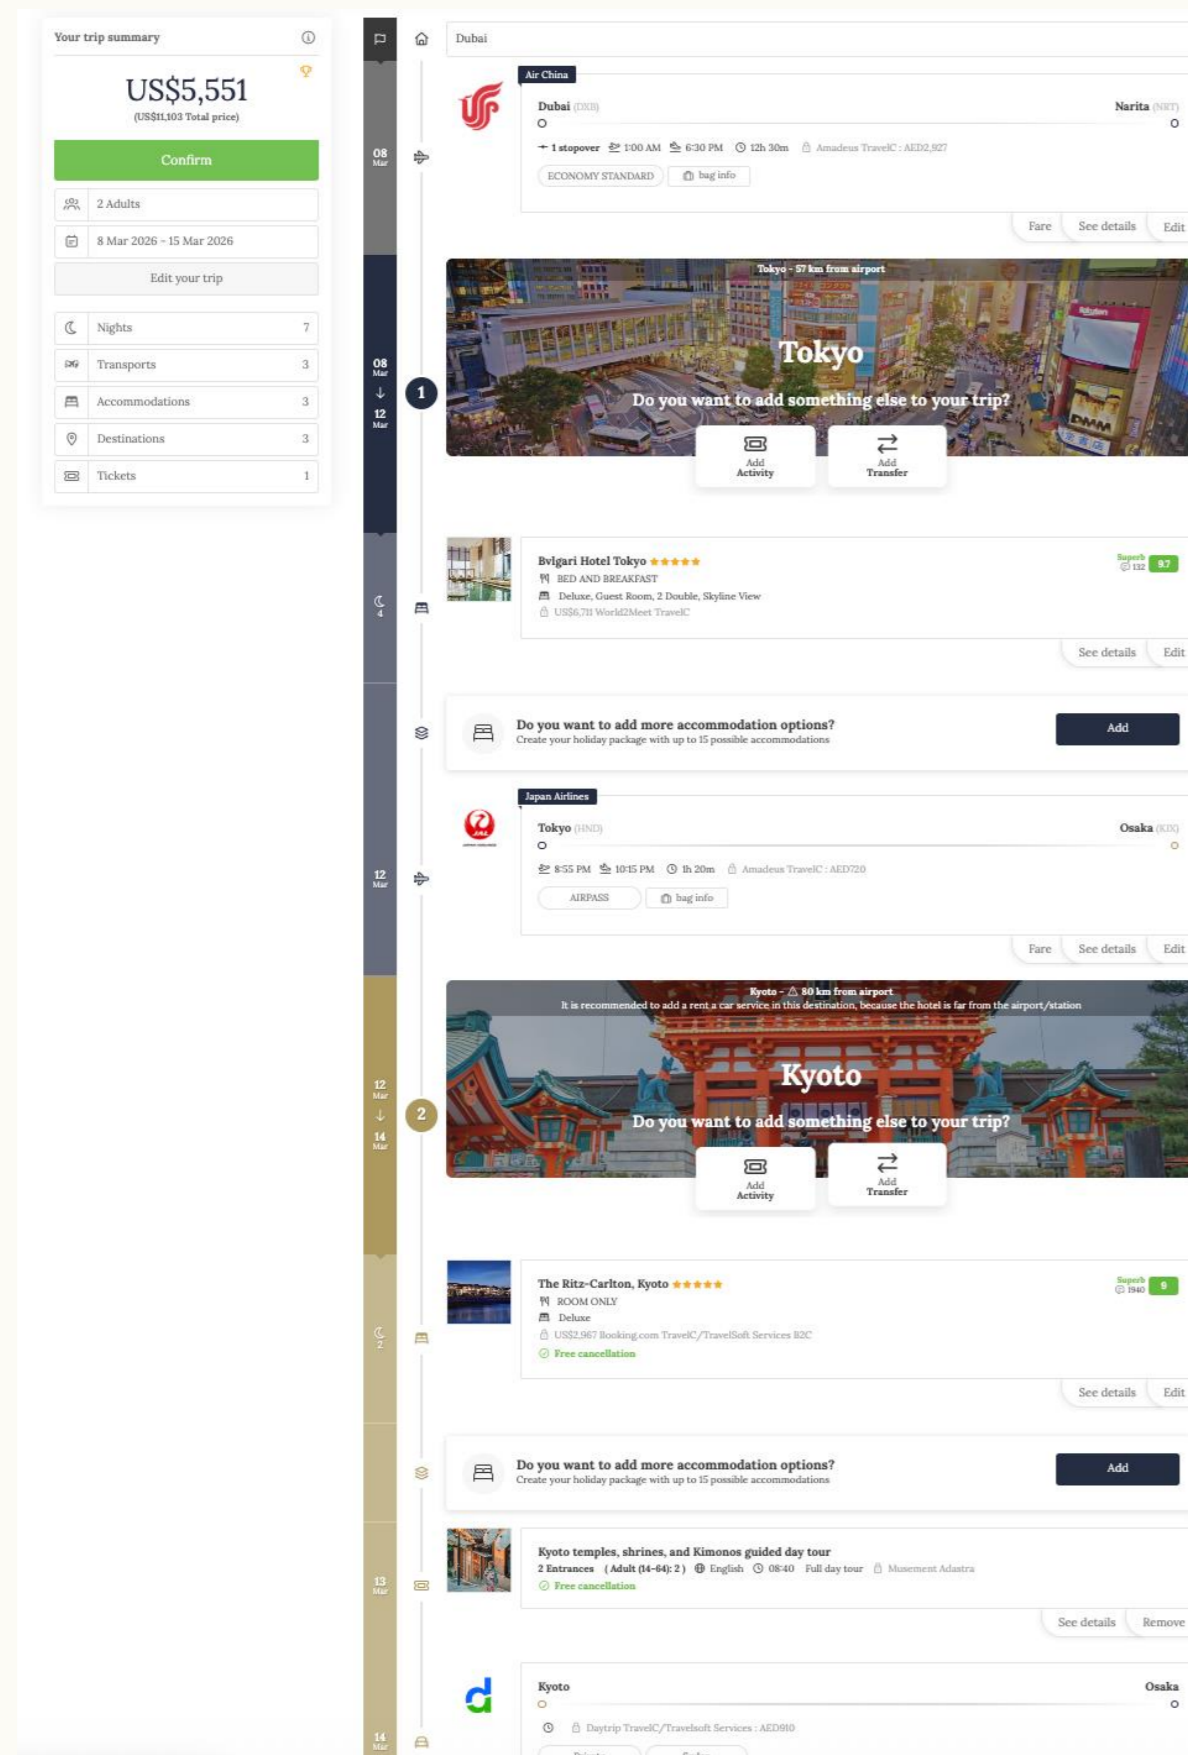

Journey Atelier by AI proposes the best-matched options — you choose what works best for you.

For every destination, you can adjust:

- Flights and Transport
- Accommodation
- Activities and Transfers

How Journey Atelier by AI Works

Crafted Journeys. Cultivated Community.

After you've made all your selections, you'll arrive at the **trip summary page**. This page brings everything together in one clear view.

Your trip summary includes:

- total trip price
- travel dates and number of travelers
- destinations and nights
- flights and transport
- accommodations
- activities and services

Everything is displayed chronologically, destination by destination.

Last Adjustments — Still Possible

Even at this stage, you remain fully in control.

You can still:

- add or remove activities
- change hotels or room types
- adjust flights or transport
- refine services and transfers

Any changes you make are reflected instantly in the summary.

Once everything looks right, you can confidently **confirm your trip**.

Journey Atelier by AI ensures you never feel rushed or locked in — you move forward only when the journey feels complete.

Once you confirm your trip, the booking is processed **as a standard booking**.
